APPLICATIONS BUILT

Check With Me

- An identity checker app that uses the WhitePages API and Google Map APIs to return name and address of phone user while also being able to map out the user address location.
- The user inputs a phone number and the owner's name and address is returned from the Reverse Phone API .
- The Google Map API allows the user to view the address of the phone owner, get directions to the address and see the satellite view of the address.
- Primarily did server-side code using APIs and CSS styling.
- Check With Me

Catch of the Day

- The Catch of the Day Web App a real-time app for a seafood market where price and quantity available are variable and can change at a moment's notice.The app includes a menu, an order form, and an inventory management area where authorized users can immediately update product details.
- Sole developer
- Catch of The Day

Swoley Grail

- Allows user to create an account, make a routine, and log your progress during each workout. Using the Meteor framework for NodeJS, the application can work both on your computer as well as mobile device.
- Primarily did server-side code and some backend using React , Meteor, MongoDB, and Material UI for styling.
- Swoley Grail App
